

RP-342 "Heavy" Military-Grade Rust Preventive Spray

Our Strongest, Thickest, Longest-Lasting (and Fastest-Drying) Rust Preventive!

- * One coat protects all metals, iron, steel (stored Indoors or Outdoors) for Years!
- * Our most concentrated, longest-lasting (and bestselling!) Rust Preventive Spray.
- * Produces a dry-to-the-touch, amber translucent (see-through) protective wax coating.
- * Faster-Drying formula allows for more convenient, mess-free and quicker handling, shipping or packaging.
- * Withstands severe outdoor exposure, salt-laden atmospheres, acid & caustic fumes and other harsh environments.
- * Repels water and will not wash off in salt water environments.
- * Will not crack, craze, peel or flake and remains slightly flexible over time.
- * Exceptional Vehicle Undercoating Product (Autos, Trucks, Buses, Trailers, etc.)
- * Aggressively adheres to imperfect surfaces and offers self-abrading characteristics.
- * Modeled after Military Specifications: MIL-PRF-16173, Grade 4 and MIL-C-83933.

COMMON APPLICATIONS INCLUDE (but are not limited to):

- * Parts, equipment and machinery storage
- * Vehicle undercarriage / undercoating (cars, buses, trucks, etc.)
- * Heavy machinery & equipment
- * Packaging
- * Dies, molds, lathes, shafts and beams
- * Offshore Drilling equipment, platforms & infrastructure
- * Farm implements
- * Overseas transportation
- * Boat shafts and propellers
- * Marine fittings
- * Rifle & other firearms preservation/storage
- * Garden tools
- * Lawn mower blades
- * Battery terminals
- * and any other surface or part that might rust on you...

Part #: 342-1031
12oz. aerosol can

APPLICATION:

Prior to application, ensure surface is reasonably clean and dry. Spray thin uniform film. For applications requiring long storage or protective durations, a second coating can be applied (if desired) after initial coat is completely dry. Complete setting of protective coating takes approximately 1 hour. Typical first application Dry Film Thickness is 2.0 Mils (51 Microns)

REMOVABILITY:

RP-342 "HEAVY" can be easily removed with any over-the-counter petroleum solvent. Examples include mineral spirits, paint thinner, naphtha, diesel fuel, or our very own Ultimate Cosmoline Remover.

MILITARY SPECIFICATIONS:

RP-342 "HEAVY" is modeled after military specifications: MIL-PRF-16173E Grade 4, Class 1 and MIL-C-83933
